

Shareholder Information System (SIS) 6.0

Installation Instructions

Application Installation

If previous version of SIS exists proceed to step 1 below otherwise move to step 2.

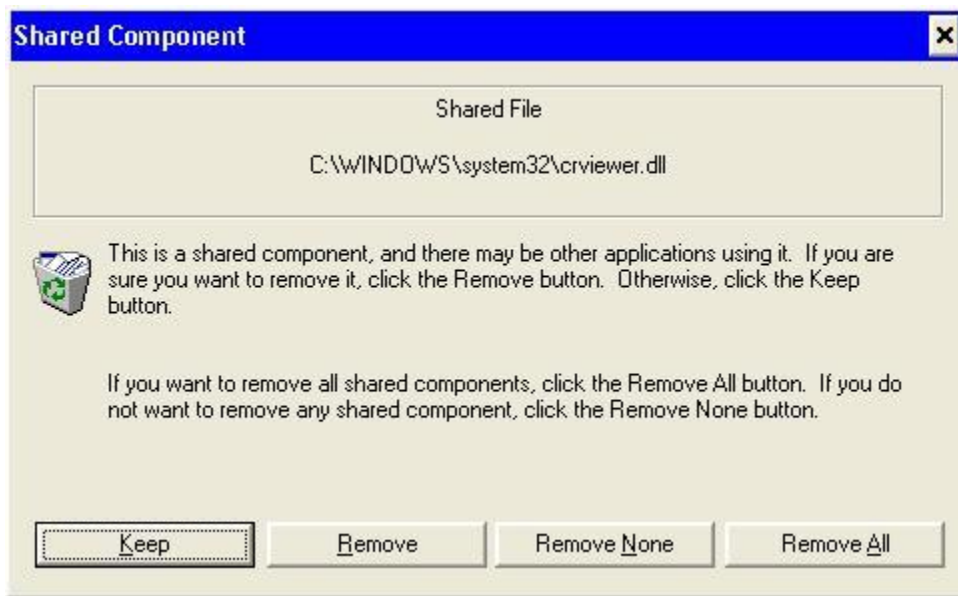

1. Uninstall the previous version of SIS.
 - a. Navigate to Control Panel → Add or Remove
 - b. Search for Shareholder Information Systems

- c. Select Change/Remove
 - d. Select Yes to remove Shareholder Information System

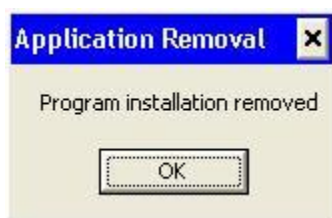

- e. If the prompt below is experienced select Remove All

Select OK

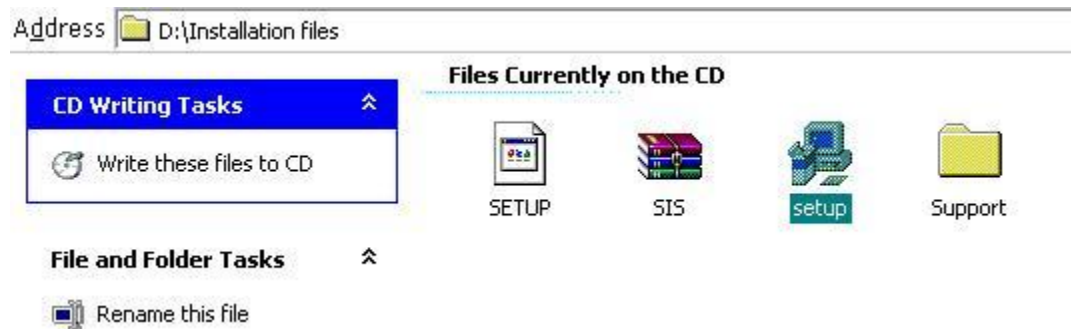

- f. When uninstall is complete the prompt below will be displayed.

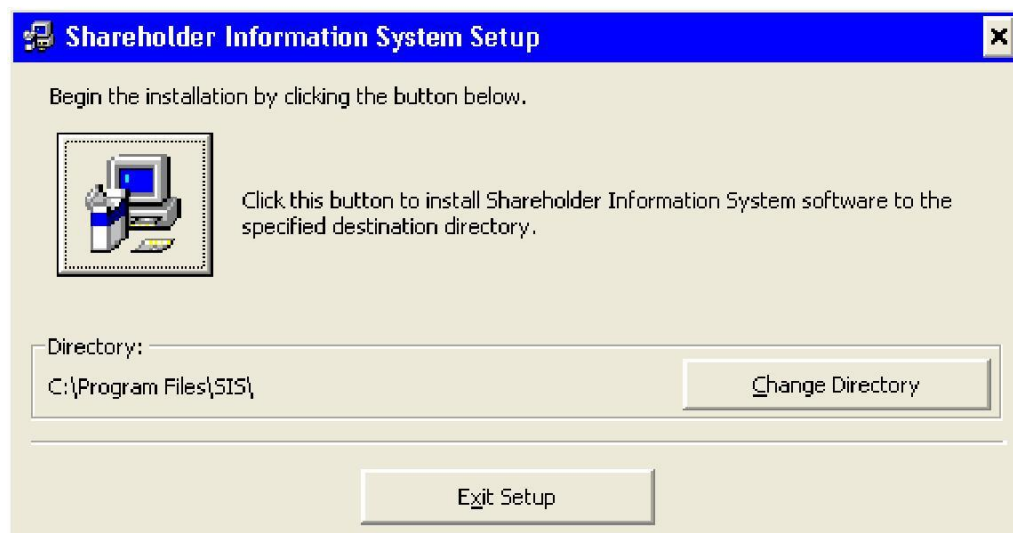

2. Install the application using the setup and package provided (CD provided).

Please note that on older machines the installation repeatedly asked to restart the system before beginning installation. This was fixed by renaming a few dlls that were already on the system. These were MFC42.dll and IMplode.dll, a search was done on the systems for these files and when found were renamed.

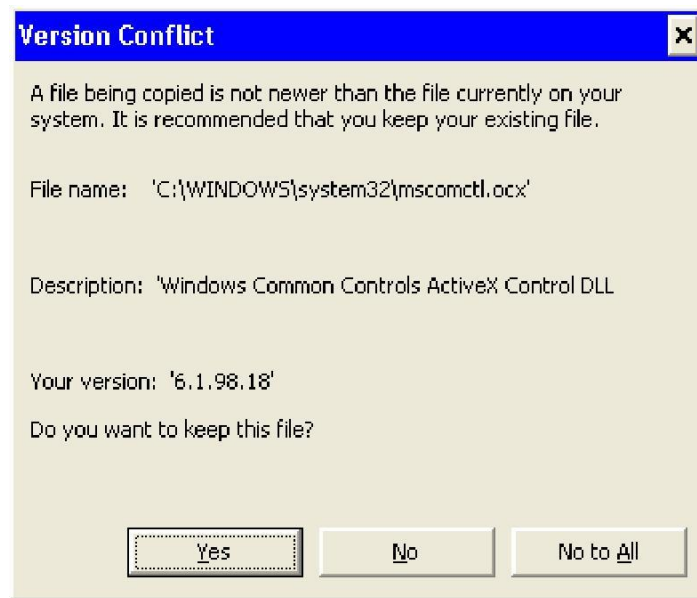

- a. Launch Setup from setup.exe in installation folder

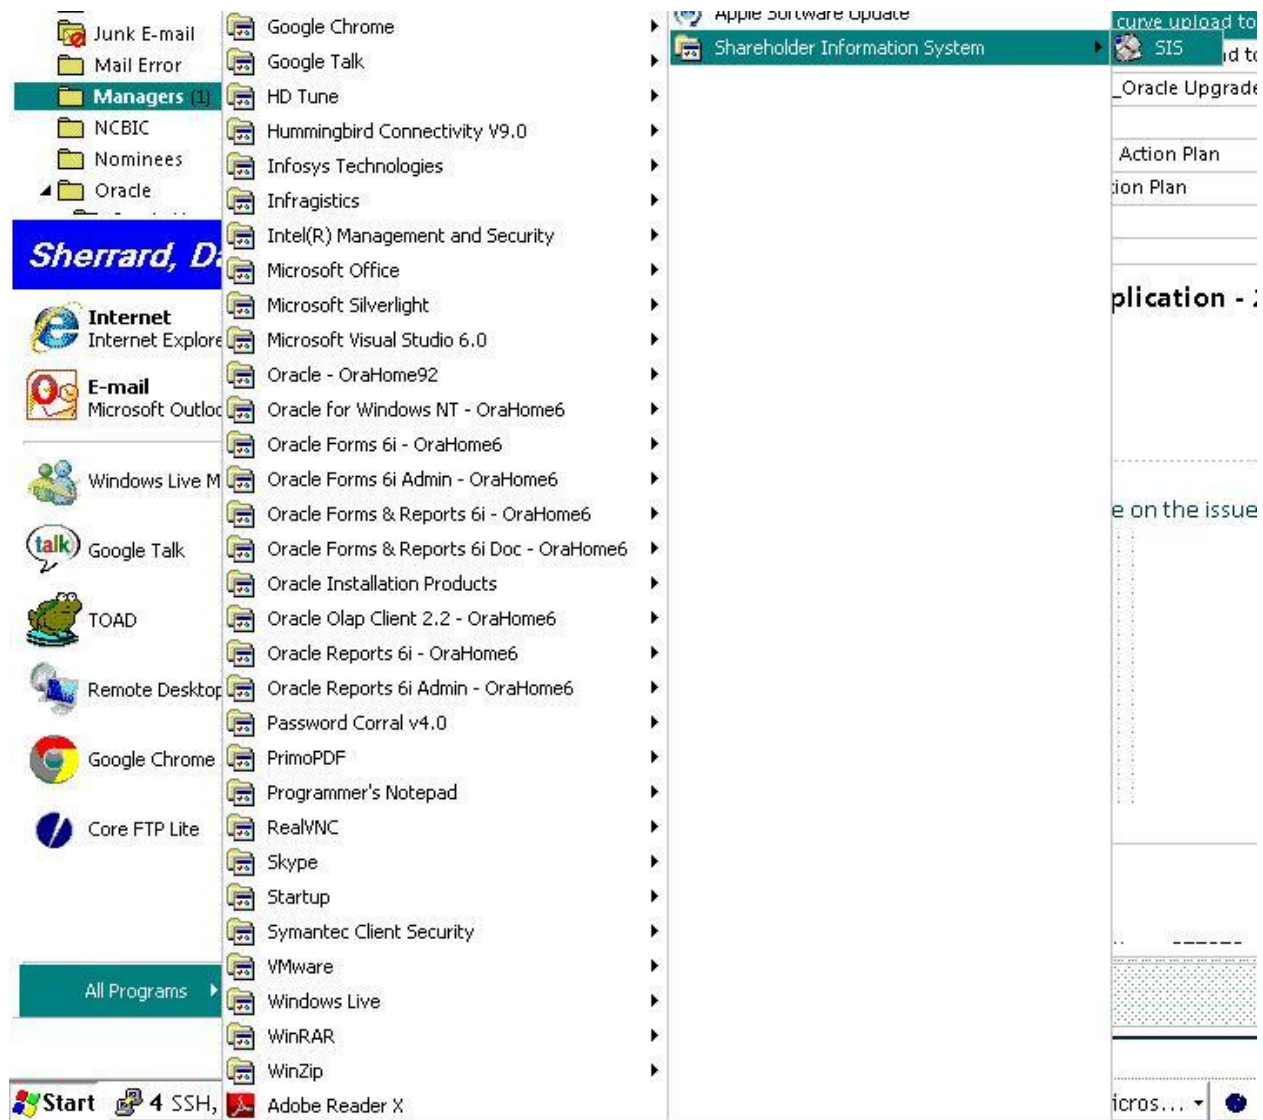

- b. Installation will begin
- c. Accept all defaults

If you encounter any version conflicts as below please select Yes to keep the newer version of the file.

Application can be found as shown below

3. Update Executable and DLL files.
 - a. Navigate to C:\Program Files\SIS
 - b. Backup files SIS.exe, SDIActiveX.dll and SISRept.dll
 - c. Replace with files in Sources directory.
